	Identification (Vitamin D3)	To pass test
	Loss on drying	1% max
	Assay (as Vitamin D3)	100,000-110,000 IU/g
	Particle size	
	Thru an 18 mesh	100%
	Thru a 36 mesh	60% min
	Thru a 100 mesh	10% max
	Microbial limits	
	Total aerobic	100 cfu/g max
	Yeast and molds	10 cfu/g max
	Escherichia coli	Absent
	Salmonella	Absent

PACKAGING	1 kg Jerry can/PET bottle lined inside with 2 LDPE bags, 5 kg, 10 kg and 25 kg drum lined inside with 2 LDPE bags
------------------	-------------------------------------------------------------------------------------------------------------------

APPLICATIONS:	Vitamin D3 supplement for directly compressible tablets and hard gelatin capsules.
----------------------	------------------------------------------------------------------------------------

STORAGE INSTRUCTIONS AND SHELF LIFE:	These items are stabilized; hence, the potency of the vitamin is retained for much longer periods. The product can be stored in recommended storage conditions without nitrogen flushing at approximately 20° C in a dry area away from the sunlight. Shelf life is a minimum 30 months, if kept in original unopened container, in a temperate dry warehouse.
---------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

OTHER:	ISO 9001:2000 certified, State Drug License and follows cGMP The source of the vitamin D3 is from sheep wool from New Zealand and Australia, which is Non-GMO and TSE-BSE Free. Kosher certified: Star K
